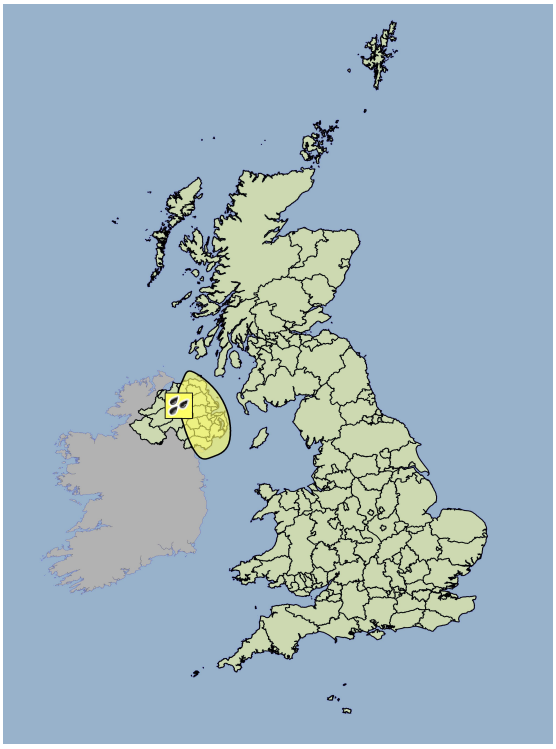
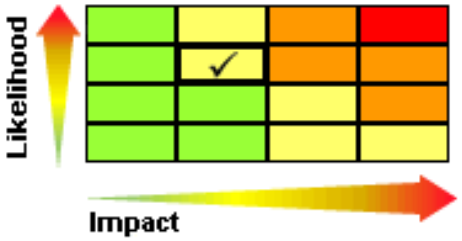
National Severe Weather Warning Service





CANCELLED

Chief Forecasters Assessment
An area of low pressure just west of Ireland will bring bands of heavy showers northwards across Northern Ireland. 10-15 mm of rain could occur within an hour very locally whilst some places could see 20-30 mm in a 3-6 hour period. Given that the ground is already wet, following recent heavy rain, some localised surface water flooding is possible.

There remains uncertainty regarding the extent and timing of the heavy rain, with some areas missing the worst.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **02:00 on Sun, 16th Oct 2016** until **21:00 on Sun, 16th Oct 2016**

Bands of heavy and possibly thundery showers are expected to continue to run northwards across Northern Ireland through Sunday.

Please be aware of the risk of localised surface water flooding and difficult driving conditions.

For more details please go to:
